

P06 Android II

1

Write a stock app in Android. Start by using a static array:

```
class Stock(var name: String, var symbol: String, var value: Double) {}
```

```
val items = mutableListOf(
    Stock("Apple", "AAPL", 115.69),
    Stock("Microsoft", "MSFT", 214.36),
    Stock("Google", "GOOGL", 1519.45),
    Stock("Salesforce", "CRM", 255.52),
    Stock("Facebook", "FB", 260.02),
    Stock("Amazon", "AMZN", 3201.86),
    Stock("eBay", "EBAY", 54.05),
    Stock("Twitter", "TWTR", 45.41),
    Stock("Snapchat", "SNAP", 28.11))
```

Present these stocks in either a `ListView` or `RecyclerView`:
