P03 App Design 2

1
In last week's lesson, you discussed a problem that could be solved by creating a new app or by improving an existing app. Discuss possible solutions and create wireframes, mockups, and – if an appropriate tool is available – a prototype for the application.

Results:

- Wireframes (two to three screens)
- Mockup (main feature, one screen)
- (Optional) Prototype of one important interaction

Format:

- PDF with screenshots
- (Optional) Native file types: Balsamiq, Origami, …
